EXIT EXAMS
A nursing student’s journey is unique, defined by obstacles and accomplishments. As someone who’s been there before, you understand that journey better than anyone. That’s why we’ve combined the powerful predictive accuracy of HESI Exams and the market-leading content found in Elsevier textbooks to provide you with the most reliable testing and remediation products available. With the right evaluation tools, you’ll be able to ensure your students’ success from the moment they begin their studies until they take their NCLEX® Exam.

From admission to exit, HESI gives you the tools to make sure the journey from student to nurse is paved with preparation.

LET’S GET STARTED.
Following Bloom’s Taxonomy, HESI’s comprehensive product line transitions students from knowledge-based thinking to critical thinking, helping them succeed from admission to exit.
HESI ADMISSION ASSESSMENT (A2) EXAM
Admit the best students to your program.

Evaluate your program applicants with the HESI Admission Assessment (A2) Exam from Elsevier. There’s no better way to select prospective students.

With the HESI A2, you can test prospective students in three main academic areas: English, Math and Science. By assessing each student’s basic skills and pinpointing their learning and personality styles, you’ll be able to improve retention in your program, maximizing your pass rates and placement success.

It’s easy to administer the HESI A2, with two convenient testing options: online, in your school’s secure computer lab, or at any of 350 nationwide Prometric™ testing centers.
HESI PATIENT REVIEWS
Challenge students’ core nursing knowledge.

These didactic, knowledge-based patient activities are perfect for pre- and post-lecture assignments, while providing students with a first look at safe and effective patient care. Patient Reviews are uniquely designed to teach and assess the retention of core content to build students’ confidence before they encounter more challenging clinical situations.

HESI PRACTICE TEST
Assess students’ critical-thinking skills.

Help students prepare for the NCLEX-RN® exam with practice questions written at the critical thinking level. These online exams test students on their skills in clinical application, and are accompanied by correct answers and detailed rationales. Two versions allow for flexibility and use throughout the curriculum. The Practice Version can be given to students to take on their own, providing them the opportunity to practice their test taking without being graded. The Assignment Version is gradable, allowing you to test their skills and gauge their progress.
HESI CASE STUDIES
Help students hone their clinical judgment.

Challenge RN students to apply key concepts and develop their clinical judgment with HESI Case Studies. By answering questions and viewing rationales for a range of realistic patient scenarios, students learn to manage complex conditions and make sound clinical judgments. Questions cover nursing care for patients with a wide range of physiological and psychosocial alterations, as well as related management, pharmacology and nursing concepts.
HESI SPECIALITY EXAMS

Evaluate students’ abilities at any stage of the curriculum.

Designed to measure the student’s ability to apply concepts related to a specific clinical nursing content area, our specialty exams are the ideal way to test students throughout your nursing curriculum. Comprised of 50 scored questions and 5 pilot questions, HESI Specialty Exams can save you and your faculty valuable time because you can use them as final exams. Parallel versions of the exams are available in most specialty areas.

Exams are offered in 20 RN specialties:

- Community Health
- Critical Care
- Critical Thinking
- Dosage Calculation
- Fundamentals of Nursing
- Gerontology
- Health Assessment
- Management
- Management/Community Health
- Maternity Nursing
- Maternity/Pediatric Nursing
- Medical-Surgical Nursing
- Nutrition
- Pathophysiology
- Pediatric Nursing
- Pharmacology
- Psychiatric/Mental Health Nursing
- Research
- PN-to-ADN
- RN-to-BSN
HESI CUSTOM EXAMS

Test students on the topic areas of your choice.

Submit your course syllabus or school curriculum, and our nurse educators will construct a customized, 50-, 75-, or 100-question exam for your program. Simply review and approve the test questions to ensure the exams are testing your students’ mastery of your unique set of course objectives. You may also customize a Mid-Curricular Exam for a comprehensive evaluation of your students after the first half or your nursing program.
REMEDIATION

Bolster students’ weak areas with targeted remediation.

With all of our exams, your students receive FREE, personalized electronic remediation content from the most trusted Elsevier textbooks available. Targeted specifically to each student’s unique knowledge deficits as identified on their HESI Individual Scoring Reports, students receive specific feedback about subjects answered incorrectly and detailed analyses to help them bolster their performance on subsequent exams. For educators, enhanced online reporting capabilities allow you to monitor your students’ remediation and progress.

EXAM SECURITY

To ensure complete control over your exams, we offer several security features. Options such as randomization of questions, password protection, and IP address restrictions give you peace of mind that each exam remains secure.
HESI EXIT EXAMS
Prepare students for graduation and beyond.

HESI Exit Exams allow you to measure students’ readiness for the NCLEX-RN® examination with question formats and an exam blueprint matching the latest NCLEX-RN® Test Plan. These exams are also used to identify the strengths and weaknesses of your students and the possible need for remediation prior to taking the NCLEX-RN®. Parallel versions of the exam are available, ensuring your students will never retest with the same exam or test questions.

With a proven accuracy rate of up to 98.3%, no other testing company has a higher rate of predicting NCLEX® examination success.
REPORTING
Assess student performance and evaluate your curriculum.

Detailed diagnostic reports are provided with each of our exams for both students and educators. Student reports provide a comprehensive synopsis of individual exam performance, while remediation reports help you take a more active role in tracking the remediation progress of your students.

The institutional student aggregate report is prepared for every school that administers our exams, providing helpful information for curriculum evaluation. Institutional diagnostic reports include an item-by-item topic comparison between your group’s percentage answered correctly and the national group norm answered correctly. In addition, reports include a breakdown of your class or test aggregate’s scores in categories such as Specialty and Sub-Specialty Areas, Client Needs, Nursing Process, and Nursing Concepts. Also included are several scoring categories of interest when tracking program outcomes for CCNE® and NLNAC® accreditation including those based on the NLN Educational Competencies Model, AACN Essentials and QSEN Pre-licensure Quality/Safety Competencies.
HESI LIVE REVIEW

Ensure student success with expert, in-person instruction.

The HESI Live Review course builds students’ confidence as they prepare for the NCLEX-RN® by participating in this personalized, discussion-driven onsite instruction by knowledgeable nurse educators and clinicians. With HESI Live Review, you can customize a course based on the content and topic areas where your students need help the most. During the 3-day review course, our professional instructors offer a complete, cumulative review of topics that appear in the NCLEX-RN®.
RESEARCH & DEVELOPMENT

Predict student success using valid and reliable exams.

A rigorous, scientific process.
All HESI test questions are written by nurse educators who specialize in the field in which they are writing. Questions are written according to the HESI critical thinking model (which mirrors the NCLEX® item writing process), and then reviewed by an expert panel, with each test question psychometrically evaluated for consistency, readability and style.

Proven accuracy and statistical effectiveness.
HESI exams are nationally normed and statistically analyzed to ensure they are valid and reliable indications of student success.

In-depth research studies show why exam results can predict NCLEX® success.
HESI exams are the only testing products with more than 30 published, peer-reviewed articles spanning a decade of research that support HESI exams’ validity and reliability. Extensive research on our exams has been published in prestigious, peer-reviewed journals such as CIN: Computers Informatics Nursing; Nurse Educator; and the Journal of Nursing Education. Investigators have found HESI exams to be successful measures for benchmarking program outcomes, measuring student achievement, and guiding remediation prior to licensure candidacy.
You can’t give them the answers, but you can give them the tools to reach their goals.

MAKE THEIR JOURNEY A SUCCESSFUL ONE.
